CRYOLIPOLYSIS + MUSCULPTING 2 IN 1

Fat Reduction + Muscle Building

One machine, two most popular technologies, building a perfect body

FAT REDUCTION

MUSCLE BUILDING

This machine integrates two of the most advanced and popular slimming and shaping technologies on the market, cryolipolysis and high-energy electromagnetic wave technology. Cryolipolysis can effectively reduce body fat, and high-energy electromagnetic wave technology has a perfect effect on shaping and muscle building. The perfect combination of the two technologies achieves the combination of fat reduction and shaping, which can create a perfect figure of the body.

NEW GENERATION 360 DEGREE HANDPIECE

High-definition touch screen
Screen size 3.5inch

Medical soft silicone material

Replaceable contours

Change contours with ease

Contours are securely fastened to the handle quickly ,
very convenient for different areas treatment

FOR THE BUTTOCK

Musculpting Pro works on the buttocks as well, using the same supramaximal muscle contractions as with the abdomen area. Many patients opt to try this treatment in place of an invasive Brazilian butt lift. HIFEM technology delivers the world's first noninvasive butt lift procedure. This treatment can give you the curvature, tone, and lift that you desire. It is an alternative to the Brazilian Booty Lift procedure and provides a defined shape instead of adding excess fat to the area.

NEW CURVED APPLICATOR CINTOIRS ARMS, THIGHS & CALVES

The Curved handle is sure to be welcomed by the thousands of men and women who want a little help with contouring the arms with stronger, more defined triceps and biceps and individuals who want to tone, lift, and sculpt the upper regions of their legs.

SPECIFICATIONS

Cryo temperature:	-10℃~5℃(adjustable)
Sizes of handle:	A Handle: 235*65+47mm; 235*74*34mm 255*65*55mm; 255*78*40mm B Handle: 180*65*50mm; 190*65*55mm; 210+65*70mm; 220*65*80mm C Handle: 125*50*45mm; 135+50+50mm; 145*50*70mm D Handle: 83*30*50mm
Vacuum:	0-100Kpa
EMS Frequency:	1-150hz
Power:	5000w
Intensity:	7Tesla
Screen:	12.4inch
Pulse width:	310μs±10%
Cooling:	Air Cooling
Voltage:	AC220V±10% 10A 50HZ , 110v±10% 10A 60HZ
